PAMF Strategic Plan

Phragmites Adaptive Management Framework 2020-2025

Our mission is to find the best strategies for managing invasive *Phragmites* in the Great Lakes region

We envision a program that transforms the way that invasive *Phragmites* management decisions are made throughout the Great Lakes region

FOCUS AREAS	*PHRAGMITES* MANAGEMENT	COLLECTIVE LEARNING	ACTIVE PARTICIPATION	PROGRAM SUSTAINABILITY
GOALS	PAMF management guidance is widely used to reduce the prevalence of invasive *Phragmites* in the Great Lakes region	 PAMF uses its annual monitoring and data-driven modeling to understand how invasive *Phragmites* responds to management actions	PAMF engages a diversity of active partners, and participation in PAMF is a standard practice for *Phragmites* managers	PAMF is supported by a stable financial and programmatic knowledge base and reflects evolving management priorities and practices
OBJECTIVES	PAMF management guidance is used to control *Phragmites* in management units *Phragmites* infestations are reduced in actively managed units PAMF outputs and outcomes are documented for scientific and management audiences	PAMF reduces uncertainty surrounding the efficacy of different *Phragmites* management combinations High quality and quantity data are used and maintained within PAMF The PAMF model is documented, maintained, and improved PAMF uses adaptive management techniques to evaluate its foundational structure	PAMF maintains engagement of existing partners PAMF recruits new participants and partners Management units are representative of the Great Lakes region	Multiple partners invest in maintaining PAMF The PAMF program evolves over time based on model learning and participant feedback PAMF is integrated into relevant agency funding and management activities
